

CONFIRMATION

Umweltbundesamt

**Announcement about the uniform practice in
monitoring emissions and ambient air,
circular from the Federal Environment Ministry (BMU) of 2008-08-12,
publication BAnz. 2008-09-03, no. 133, p. 3243ff.**

IV. Suitability of measuring equipment for the continuous monitoring of ambient air

Under reference to the number 3.2 of the announcement that for the realisation of the guideline 96/62/EG the advice's of the 27th September 1996 about the judgement and control of the air quality responsible places of the 1st October 1998 (BAnz. P. 15.126) the suitability is announced in the task of the BMU to the following measuring equipment:

1 Carbon monoxide

1.2 CO12M

Manufacturer:

Environnement S. A., Poissy Cedex, Frankreich

Suitability:

Continuous measurement of CO in ambient air.

Measuring ranges during the suitability test:

CO: 0 - 60 mg/m³ 0 - 100 mg/m³

Software version:

V1.26

Restriction:

-

Remark:

-

Test Report:

TÜV Rheinland Immissionsschutz und Energiesysteme GmbH, Köln, TÜV Rheinland Group
Report-No. 936/21206773/B - 2008-02-29
